Portfolio: asejs.github.io

asesagebakken

Asejs

Skills

DAILY USE

- Vue.js / TypeScript
- GraphQL
- HTML / CSS / SCSS
- Vite / Vitest
- Storybook
- Git / Azure DevOps / CI/CD
- Claude Code

PREVIOUS EXPERIENCE

- React / Zustand / TanStack Query
- Jest
- C#/.NET

Volunteer roles

Event coordinator
Tollboden, Innseiling
2024 | Bouvet Stavanger

Marketing lead
UiS Subsea
2022 | University of Stavanger

Courses

Workshop: Practical React with TypeScript
04.2024 | Bouvet Norge AS

Interests

Yoga · Hiking · Running · Strength training · Photography · Painting · Travel

Frontend Developer

Åse Sagebakken

Frontend developer with over four years of experience in product development and consulting in the energy sector. Works daily with Vue 3, TypeScript and GraphQL, and has almost three years of experience with React. Collaborates closely with backend developers, UX, QA and product owners, with a keen eye for detail and precise implementation of Figma designs. Uses Claude Code actively, and ensures quality through testing and code review.

Work experience

06.2025 – present | Stavanger
Horizon56 Frontend Developer

08.2022 – 05.2025 | Stavanger
Bouvet Consultant, Software Developer

Project experience

Horizon56 06.2025 – present

RigBridge and RigFlow

Digital platform for planning (RigBridge) and execution (RigFlow) of well operations, replacing paper-based workflows. Used by more than 9,000 users across 70+ rig operations worldwide.

- **Feature ownership:** Owns features from Figma design to production, including the approval flow for changed planned values, hyperlinks in the text editor and the ROV log.
- **Performance & backend:** Optimizes data-heavy views and takes on C#/.NET backend tasks when needed.
- **Accessibility & UX:** Improves keyboard navigation, focus management and cross-browser support. Makes UX decisions in close collaboration with UX and product owners.
- **Quality & collaboration:** Reviews code across teams, builds reusable Storybook components and was a buddy to a new frontend developer in India. Resolves support cases and demos new features.
- **Tech & tools:** Vue 3, TypeScript, GraphQL, Vite, Vitest, Storybook, C#/.NET, Azure DevOps, Claude Code

Bouvet 08.2022 – 05.2025

Equinor – Echo

Visual digital twin that gathers and visualizes data from Equinor's platforms for more efficient operations. Used at more than 50 onshore and offshore facilities, on desktop, tablet and mobile.

- **Frontend development:** Developed new features in React and TypeScript, including the MVP of Global Selection, where users collect tags and work orders in one list, integrated with the platform's 3D model.
- **Responsive design & components:** Adapted the app for mobile and tablet use in the field with PWA, and built reusable components following the Equinor Design System (EDS).
- **Release & integration:** Responsible for releasing Echo-CLI and integrating team modules, in close collaboration with UX and backend.
- **Quality & security:** Responsible for security updates with Snyk in CI/CD. Reviewed code, wrote unit tests with Jest and contributed to technical documentation in READMEs and on GitHub Pages.
- **Tech & tools:** React, TypeScript, NX, Zustand, TanStack Query, AG Grid, Jest, Storybook, OpenAPI

UiS Subsea | Bachelor's thesis 01.2022 – 06.2022

Operator interface for a remotely operated vehicle (ROV)

- **User interface:** Developed a PyQt interface for sensor data and live video, and a controller setup for steering, with TCP communication to the ROV. Used in the MATE ROV World Championship.
- **Teamwork:** Worked in a cross-disciplinary team of 18 students from computer science, electrical and mechanical engineering.
- **Tech & tools:** Python, PyQt, TCP, JSON, MJPEG, Git

Education

2019 – 2022
Computer Science – Bachelor's degree
University of Stavanger

2017 – 2019
Energy and Environmental Engineering – Master's programme
NTNU Trondheim · switched to computer science after 1.5 years
